

InsuResilience Global Partnership

Promoting resilience for the world's most vulnerable

May 18, 2021

The InsuResilience Global Partnership

The **InsuResilience Global Partnership** is the key global initiative for scaling up financing and insurance solutions for climate and disaster risks in developing countries.

Founded in 2017, **Co-led by the G20 and V20**, now more than 100 members (countries, multilateral institutions, civil society organisations, private sector, academia and implementing partners)

Our vision is to **strengthen the resilience** of developing countries and **to protect the lives and livelihoods of poor and vulnerable** people from the impacts of climate shocks and disasters by **enabling faster, more reliable and cost-effective responses**.

Goals for 2025:

- **500 million** poor and vulnerable people are covered against climate and disaster shocks.
- **15% of average annual losses** to climate change experienced by poor and vulnerable people covered

The InsuResilience Global Partnership

Collaboration towards Resilience

The Partnership, together with members from diverse sectors

Drives a common agenda
to raise ambition and set standards
in the CDRFI community

Enables convergence, collaborations
and coordinated implementation efforts
across implementing actors

Shares learning and dissemination
of best practices

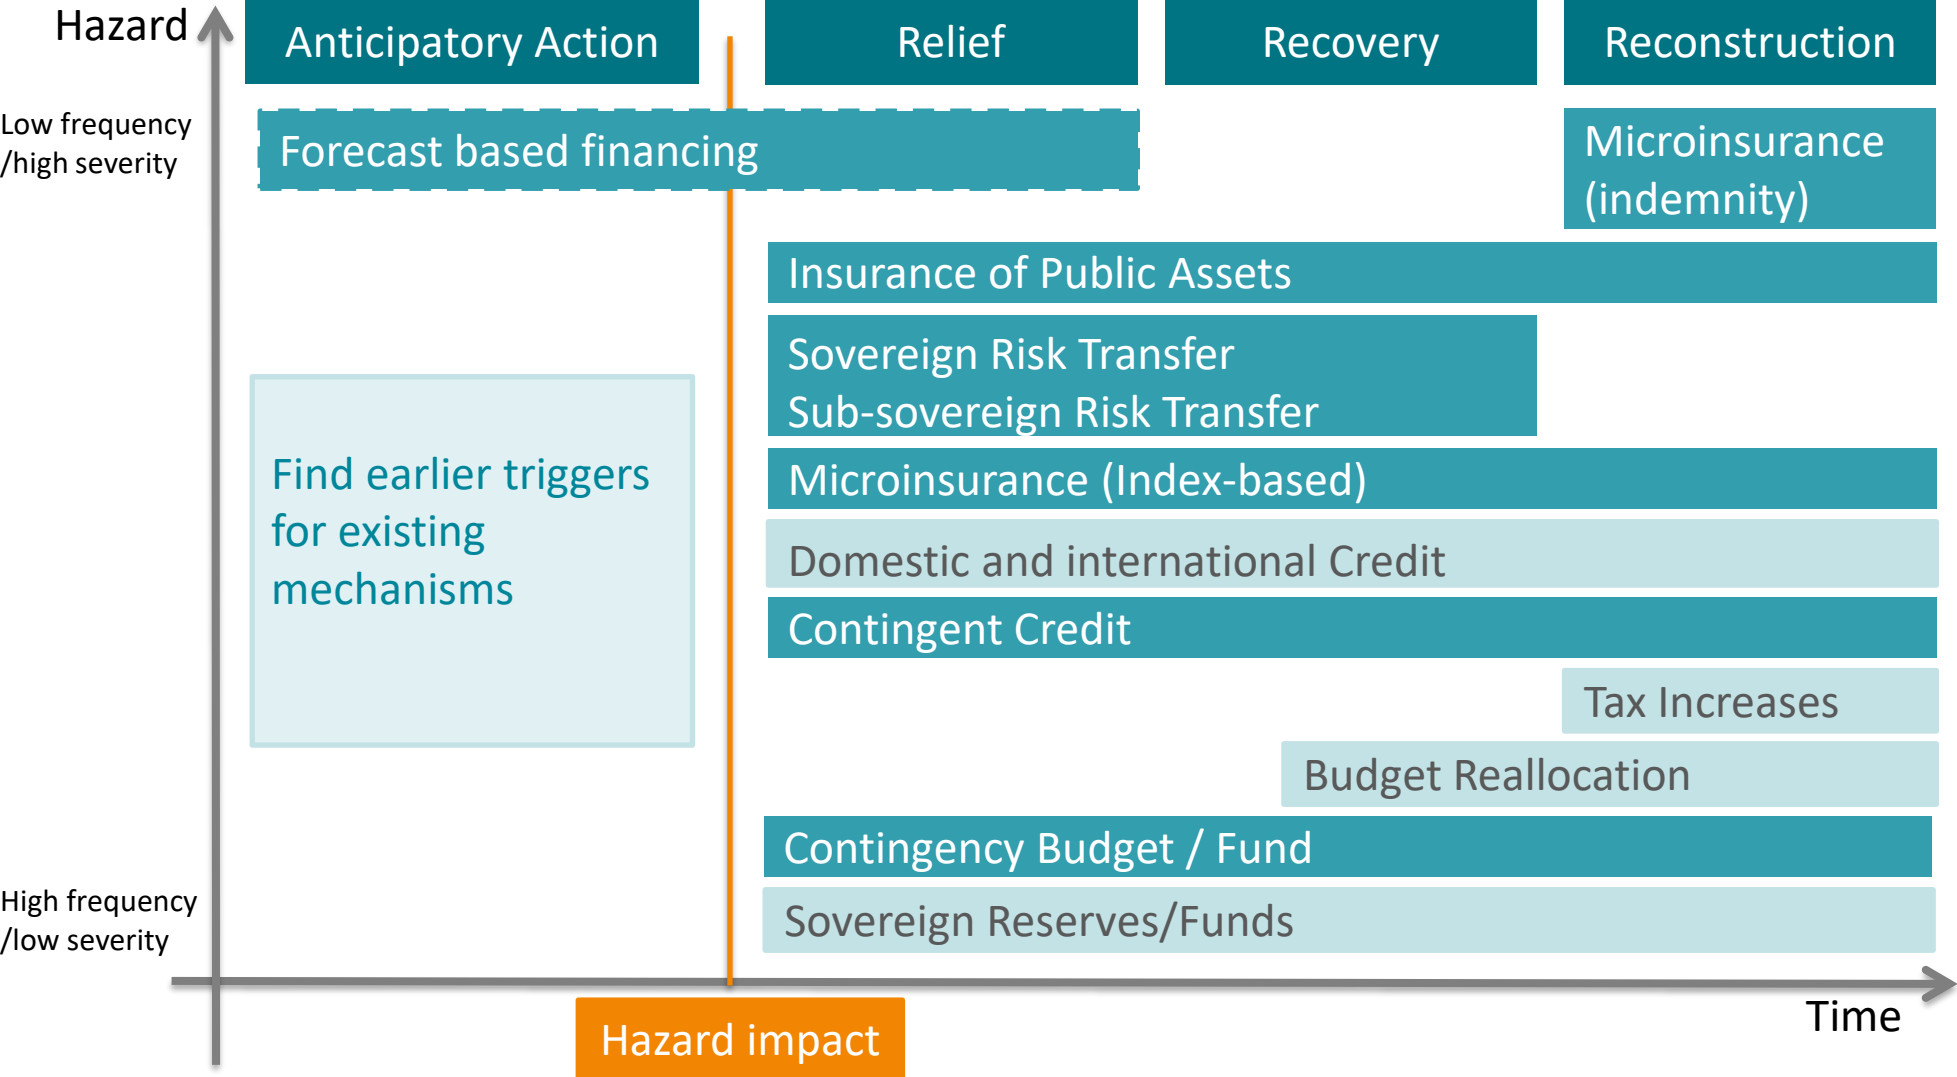

Links needs with solutions
("marketplace")

Our structure

Solutions and Implementation

Risk Layering

IGP

IGP

Solutions and Implementation Levels

Macro

Sovereign Risk Pools, Contingency Budgets, Contingent Credit

- African Risk Capacity (ARC), ARC Replica
- Development of DRF strategies
- World Bank Cat DDOs

Meso

Corporate or Institutional Risk Transfer, MSME Insurance

- Global Parametrics, Credit Portfolio Insurance (through Natural Disasters Fund, blended finance)
- InsuResilience Solutions Fund, supporting risk analysis and product development

Micro

Microinsurance, indemnity or parametric

- InsuResilience Investment Fund, blended finance fund to invest in microinsurance companies
- Global Index Insurance Facility, supporting the development of parametric microinsurance

Solutions and Implementation

PPPs – The Tripartite agreement

Solutions and Implementation

Insurance programme for public schools in Peru

► Case:

- High exposure to climate-related hazards in Peru.
- Protection of public assets is hindered by lack of funds and capacity.
- The 1,000 schools that had been damaged by the 2017 Coastal Niño have not yet been rebuilt.

Solutions and Implementation

Insurance programme for public schools in Peru

- ▶ **Project objective:** Strengthen the **resilience of more than 50,000 public schools in Peru** to natural hazards. A faster reconstruction process and resumption of schooling.
- ▶ **Product outline:** Combine insurance with pre-defined financing and reconstruction processes
- ▶ **Partners:** Peruvian Association of Insurance Companies (APESEG), equally co-funded by the InsuResilience Solutions Fund ([ISF](#)) and a project consortium formed by the Insurance Development Forum ([IDF](#)).
- ▶ **Risk Taker:** Jointly designed by the re/insurance companies AXA XL and Munich Re as well as the catastrophic risk modelers GEM Foundation and JBA Risk Management, including input from the local insurance companies.
